# Executive Director's Message

Dear Friends,

Every day, Caritas India works towards achieving a noble mission of translating the human values of love, equality, justice and peace into social action. The five-year strategic plan by Caritas India has paved the way for our emphasis on Empowerment Animation, Dialogue, Volunteering, and Sharing Communities to bring justice and dignity to people on the margins of society. It has solidified our convictions on how we will respond to the poverty of various forms and intensities, prevailing in the country.

This past year, we made significant gains in the community's health, safety and economic justice. Caritas India and its partners worked tirelessly to reach out to 48,40, 345 population by addressing the developmental challenges of gender parity, inequality, social exclusion, modern-day slavery, illiteracy, violence against vulnerable groups, unemployment, malnutrition and poverty.

Caritas India works on socio-economic justice and empowerment has helped in shaping the policy change at local, state and national level. Rather than focus on reaching the impoverished, we are concentrating our response and support based on vulnerability and impact. We were able to support 3,04,246 vulnerable people in the society to uplift their quality of life.

Caritas India is a pivotal change agent of the people's movement to convert the current system to ensure quality and affordable services and care, empowering communities towards their development, leveraging the collective strength of like-minded organisations to bring systemic change and socio-economic development to the marginalised people. In our commitment to change, we also encourage and nurture new leadership at the community level to inspire, influence and guide others to participate in the decision making process.

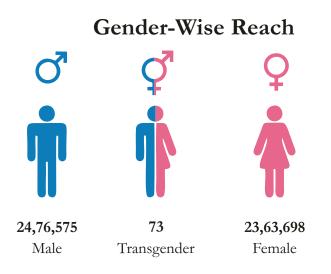

With the continued support of our generous funders and donors, we look forward to making even greater strides for community empowerment in the year ahead.

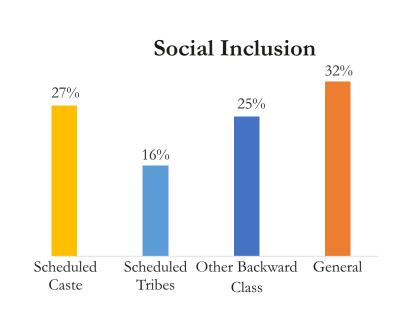

Fr. Paul Moonjely

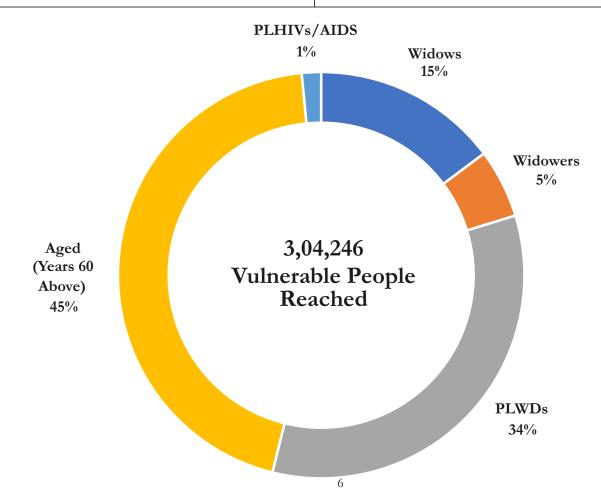

Executive Director, Caritas India

The cancer campaign in the 5 states of south India is a remarkable cornerstone, that largely accounts for a cultural and behavioral change in the community that would focus on the roots of cancer and work around the preventive focus building fences on many fronts. The efforts to mobilize and consolidate the social capital for a meaningful and concerted response has remained the agenda of the campaign.
